# SYNOPSIS

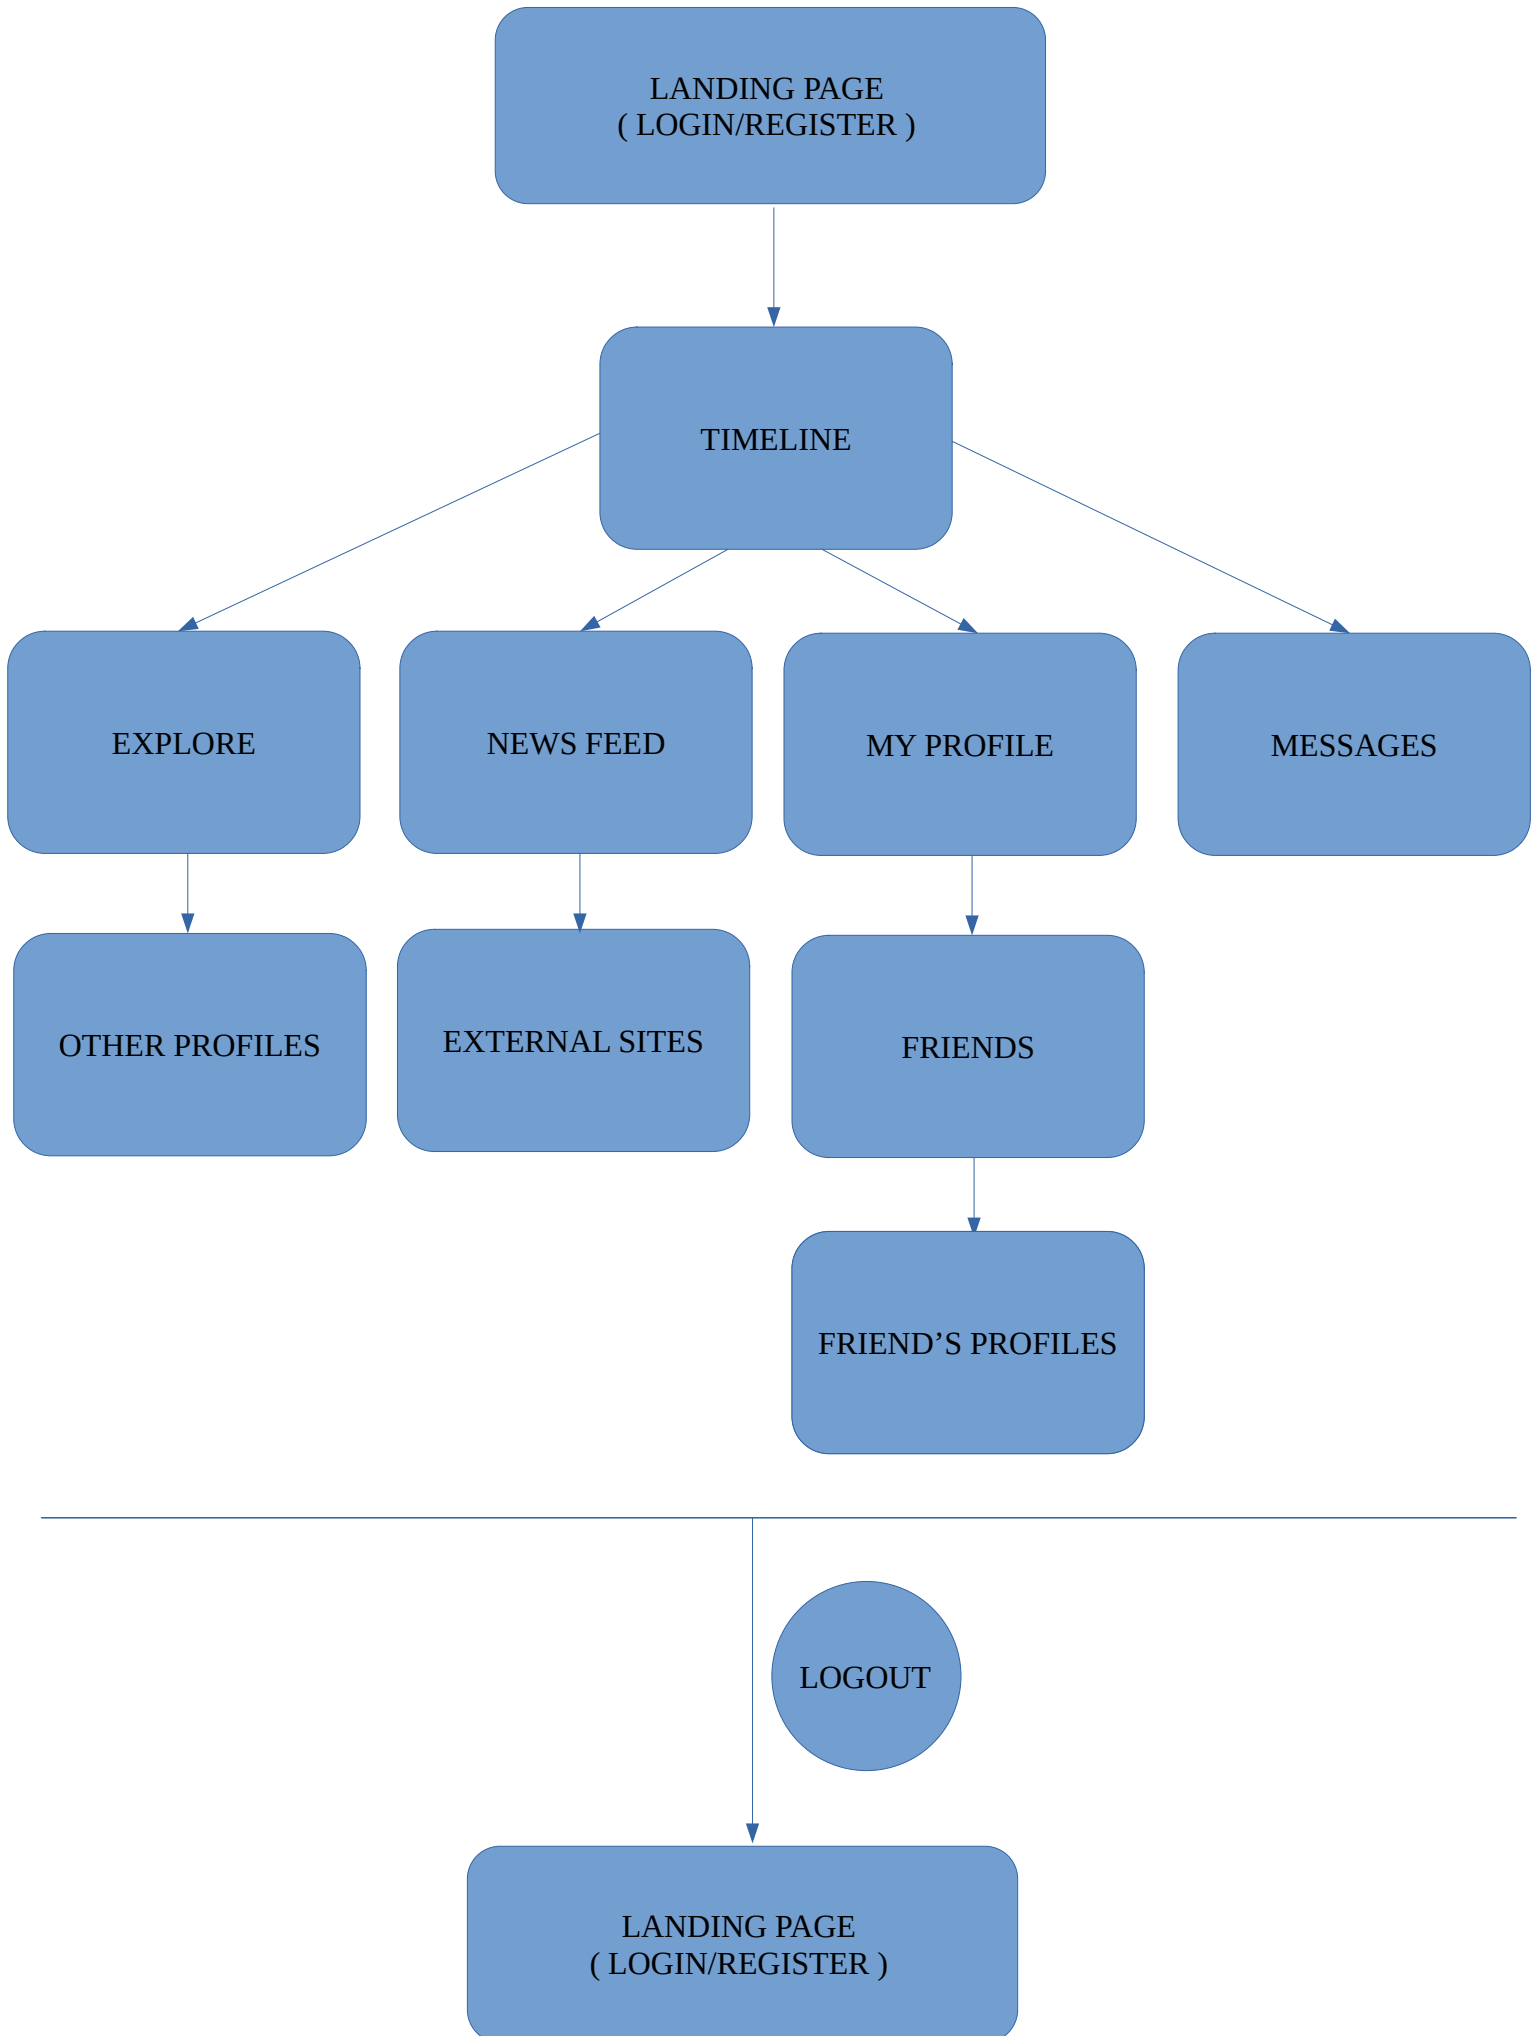

## OBJECTIVE-

It is a fast paced world with a lot of events happening everyday all across the globe, we provide a social media platform to connect with each other by sharing news, information or chatting with each other. The main objective of the Social Networking Site is to connect multiple users and allow them to share and interact with each other through posts, news and messages. It manages all the information about users, their posts, messages, profile, photos, etc.

## Its main features include -

- **Login/Register Page**
- **Profile Page** – Where details about a user can be viewed
- **News Feed** – Displays news which can be shared with friends or posted
- **Timeline** – Where posts of the users you follow are visible
- **Explore** – Where trending posts from all users are displayed
- **Messaging** – Where you can message following/followers
- **Posts Upload** – Uploading media and text
- **Commenting**
- **Search** – Search users using their name
- **Notifications** – Receive notifications for various events
